**HCC Coding Tips:**

1. Document and code to the highest level of specificity
2. Document and code all conditions that were discussed with the patient during each visit
3. Document and code all chronic conditions at least once annually
4. Document and code the specific stages of a patient's condition
5. Ensure that all conditions are updated in the patient's chart based on Summary of Care documents received from hospitals or other specialty consults
6. Limit the number of "Unspecified" or "Other" codes, unless there is not sufficient clinical information to support a more specific code
7. Include additional diagnoses to the appropriate primary diagnoses such as: BMI, and long-term insulin use
8. Up to (12) ICD-10 codes can be submitted on a claim
